

A close-up photograph of the corner of a grey upholstered sofa. The sofa has a textured fabric. A white line art graphic is overlaid on the lower part of the sofa, showing a rectangular frame with internal lines and a small rectangular detail at the bottom right corner. A small black tag with the word 'IKONO' in white is attached to the bottom right corner of the sofa. The background is a solid dark grey.

Welcome to the world of IKONO.

How we sit has a significant impact on our quality of life. As a result, we often opt for high-quality seating in our private lives, where we expect a good standard of comfort, aestheticism and individuality. We'd also prioritise this in seating in the world of business, were it but for one hurdle – flexibility. Dealing with different groups of people in a fast-paced time like ours presents us with many challenges. Offices grow, meetings must meet project-specific requirements, and through all this, companies still have to show a clear corporate identity.

What we need is a furniture system that meets these requirements in every sense of the word. One that can grow with the business, one that can be spontaneously arranged differently, one that can be specially adapted for different company identities and unusual spaces. IKONO's objective is to make the world of seating more modular without sacrificing individuality. It's a modular system tailored to a range of situations in life, whether in private spaces and terraces, for events, in the hospitality industry, wellness and spa areas, or in company working spaces.

Chapter 1

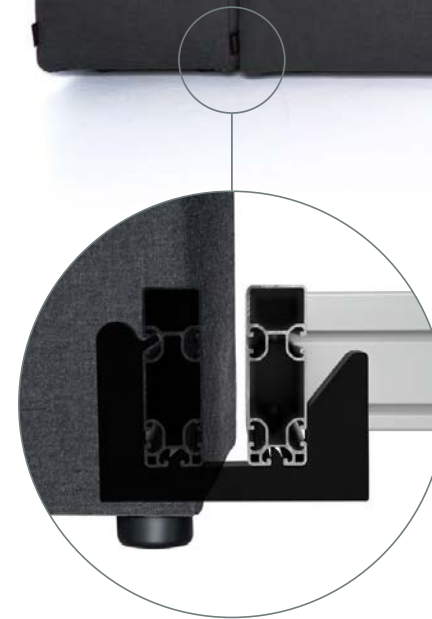

The IKONO Principle

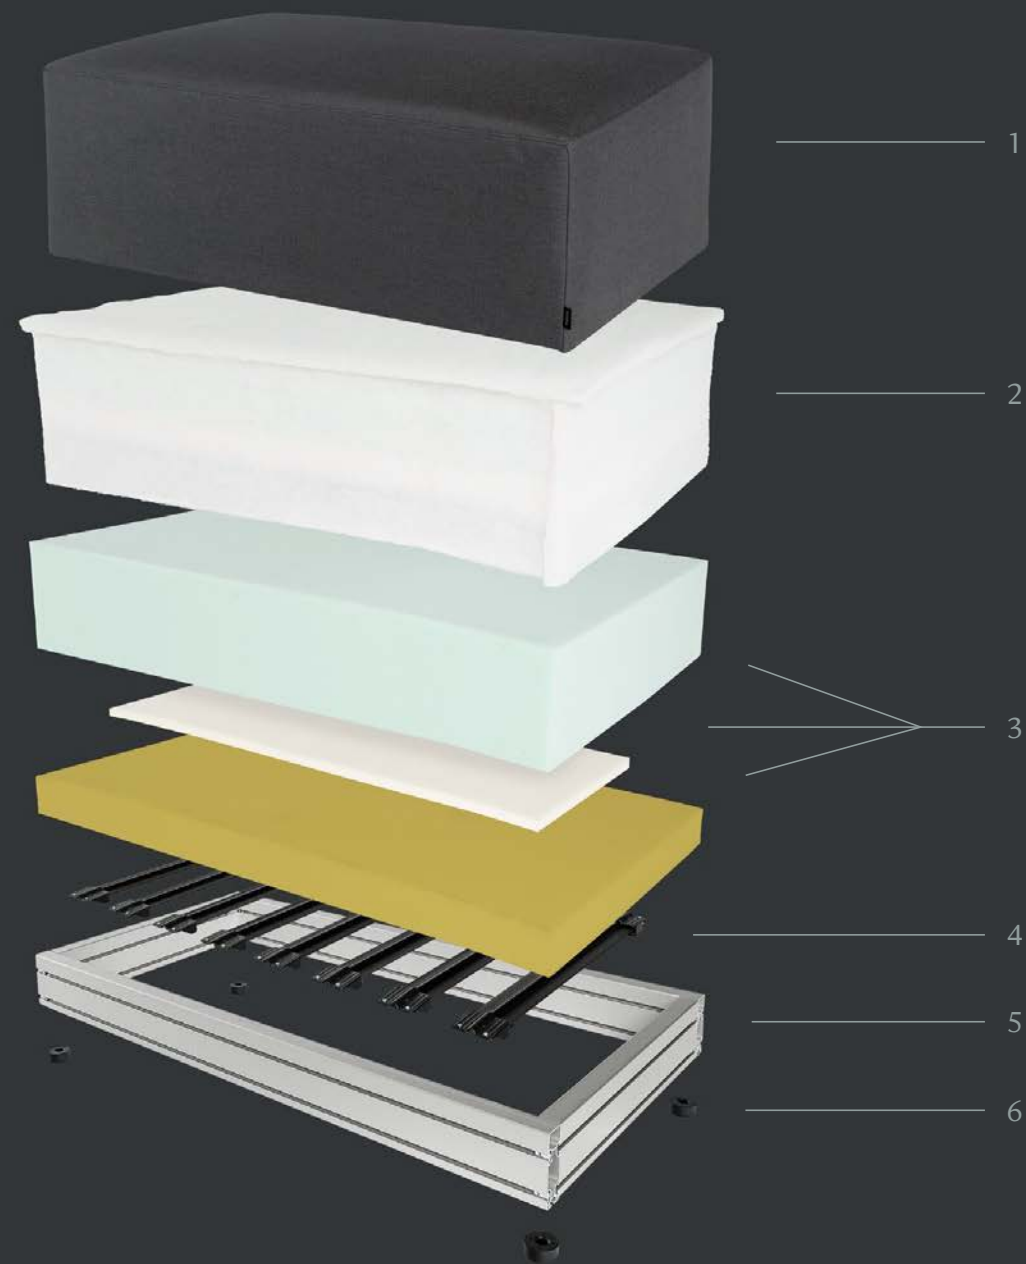

A system that offers maximum modularity and diverse applications. Materials that appeal to our senses and that can withstand all environmental impacts and room climates.

For today. For tomorrow.

The furniture system stands for endless freedom. Thanks to a patented plug-in technology, the modules can be combined in countless ways. With the Lounge elements, relaxation oases emerge, which are perfectly suited to any type of surface. With the Gastro furniture, a restaurant can reinvent itself again and again depending on the occasion, and the Office System does justice to the increasingly agile world of work.

All modules are connected with a bracket so that slipping is prevented while re-plugging allows for new shapes to be made at any time. No further tools are required.

- 1 Covers. A variety of covers can be selected based on the field of use. The outdoor fabric with its unusually pleasant feel can be used in outdoor areas as intended or in indoor spaces. Depending on the requirements in public buildings, we can offer covers with different fire safety certifications.
- 2 Waterproof cover for maximum resistance against bad weather and water logging.
- 3 Several layers with different levels of thickness of foam provide maximum comfort.
- 4 Slatted frame. Thanks to synthetic fibreglass rods, dynamic cushioning is guaranteed with the seating module.

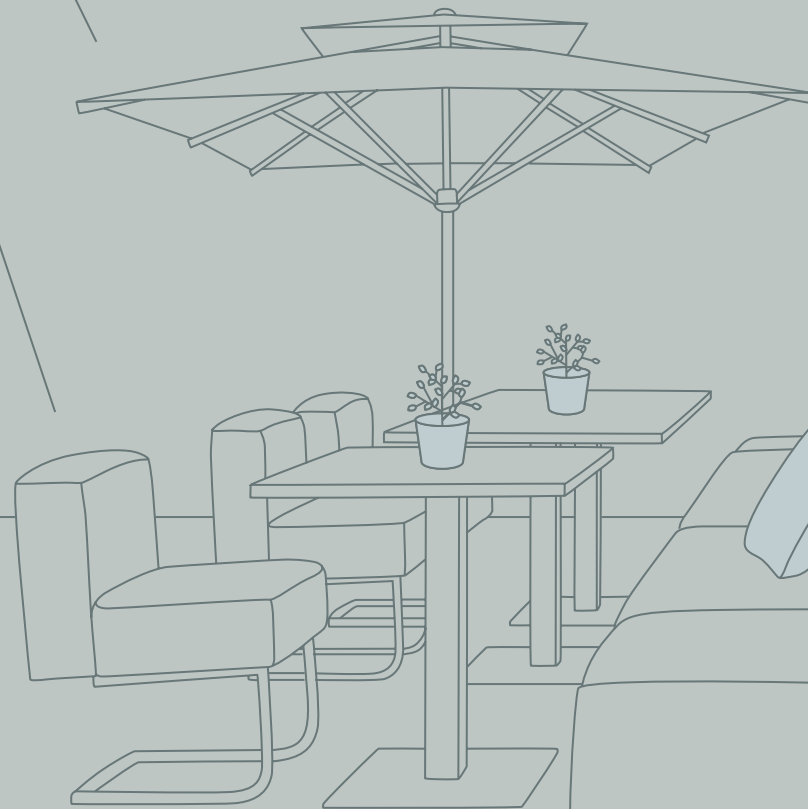

- 5 Aluminium profile. The core element of an IKONO module. Thanks to our own developed and patented aluminium frames, our modules provide an unprecedented standard of quality, suitable for all types of situation and environmental impact. The tried and tested plug-in technology for connecting individual modules is also adjusted with the frame.
- 6 Height-adjustable feet for optimal adjustment – even on uneven floors.

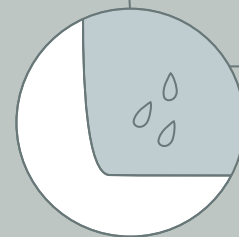

Predestined for outdoor use – even in extreme environments.

UV ray-resistant

OUTDOOR

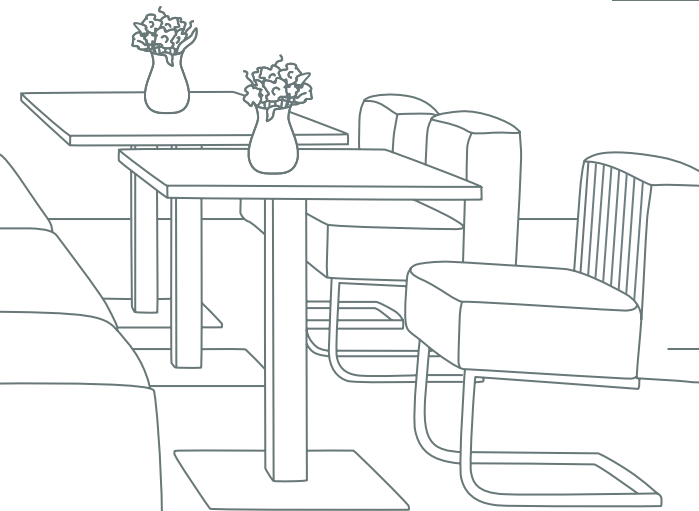

Unique material quality with lotus blossom effect.

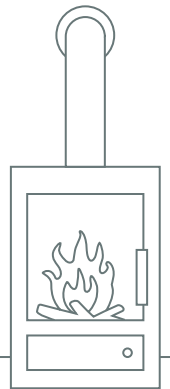

INDOOR

With branding, the furniture is suitable for any corporate design.

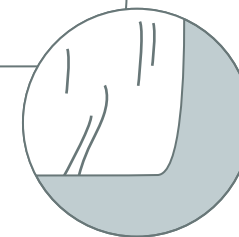

Specially manufactured artificial leather or special fabric that fully meets fire safety guidelines.

Variety of covers allows for perfect fit indoors.

Leather with natural yet expressive accents in the room.

Chapter 2

Lounge System

Lounge stands for relaxation
and taking it easy.
For living emotions every day.
For enjoying life.

The Lounge System is the centrepiece of what IKONO does and paved the way for a new modular way of thinking. Today the Lounge modules are particularly impressive since they are both freestanding and can transform whole areas into relaxation spots. With the tailor-made tray table at arm level, and the comfortable seat height of 44 cm, this is truly a cut above the rest, particularly with the unique triangle backrest, as found on the Daybeds and Relax Loungers.

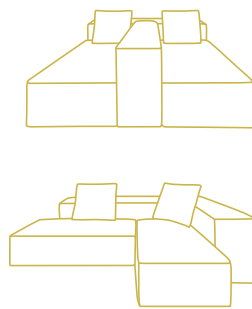

Predestined locations for the IKONO Lounge collection are pool and spa areas, as well as hotel lobbies, plus all other places where a friendly welcome reigns supreme.

Lounge – Accessories

1. Parasol

With backrest modules containing umbrella holders, any Lounge set can be supplemented with high-quality parasols. They are available in a variety of UV-resistant fabrics, as well as in two different shapes: round and rectangular.

250 x 250 cm

DM 250 cm

2. Tray table

With laminate pressed under high-pressure, the tray tables are completely robust and weather-resistant. They can withstand direct sunlight, dirt and rain, and can be easily cleaned with a damp cloth. Due to being tailor-made, the tray tables can be stacked on seat stools as well as on backrest modules.

W 40 x D 35 x H 15 cm

3. Soft cushions

Decorative cushions and lumbar support cushions in one.

L 30 x W 65 cm

L 40 x W 40 cm

4. Soft cushions with bolster

The back cushion with removable bolster complements the Lounge set both in look and comfort.

L 60 x W 60 cm

5. Leaning triangle

The leaning triangle is another addition promising maximum flexibility. Thanks to the anti-slip finish and inner compartment system, it offers ultimate grip.

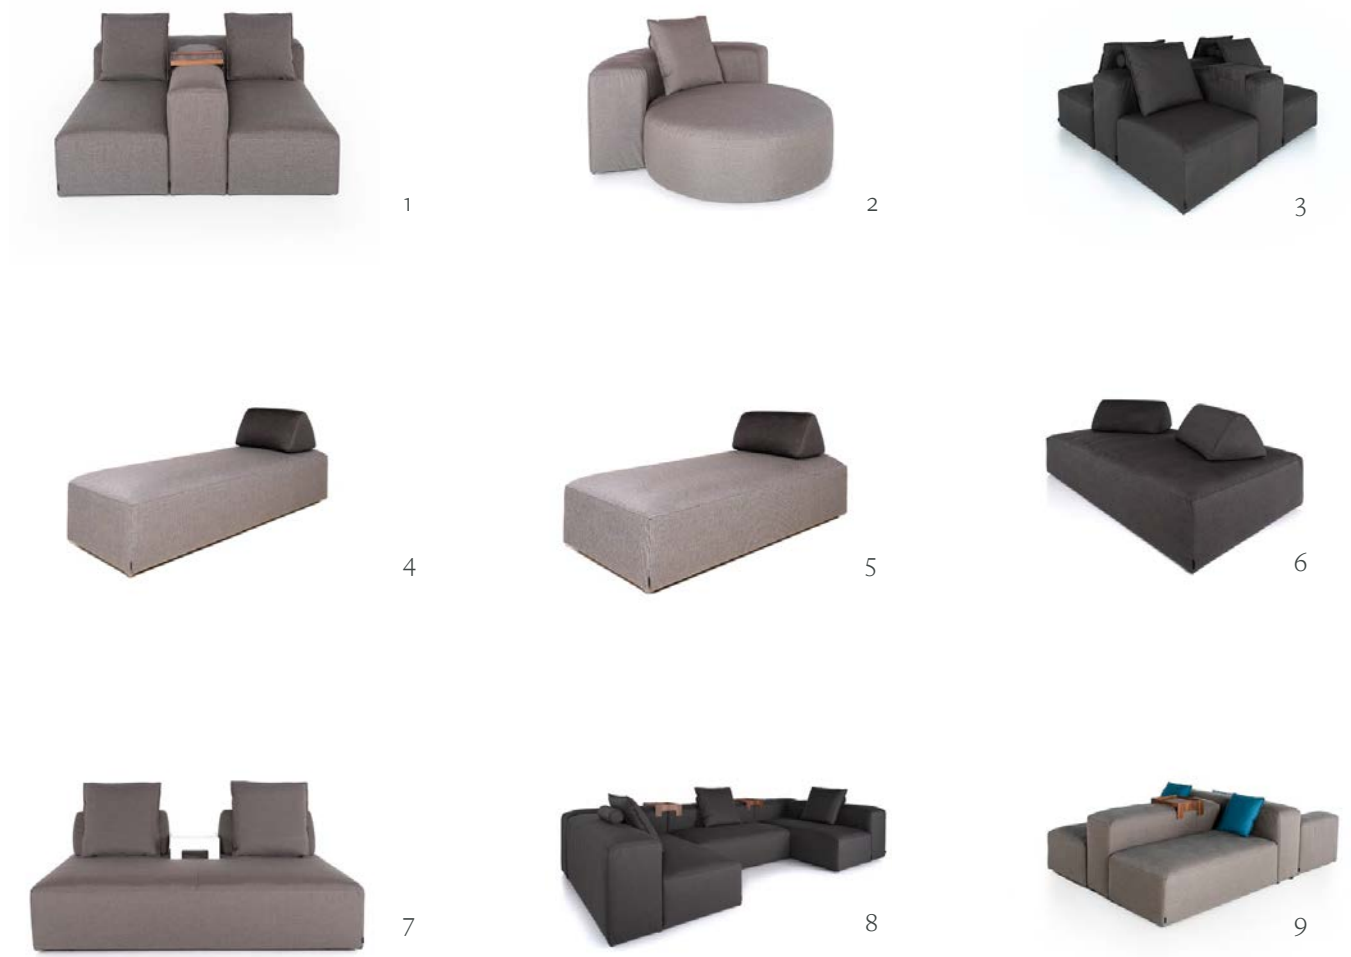

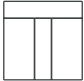

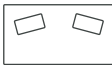

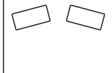

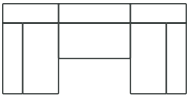

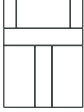

H 30 x W 60 cm | H 30 x W 70 cm

6. Tailor-made protective covers

Each module comes with a custom-made transportation cover that can also be used as a protective cover for use in the colder months. This ensures that we completely spare the environment from large-scale disposable plastic packaging.

Chapter 3

Gastro System

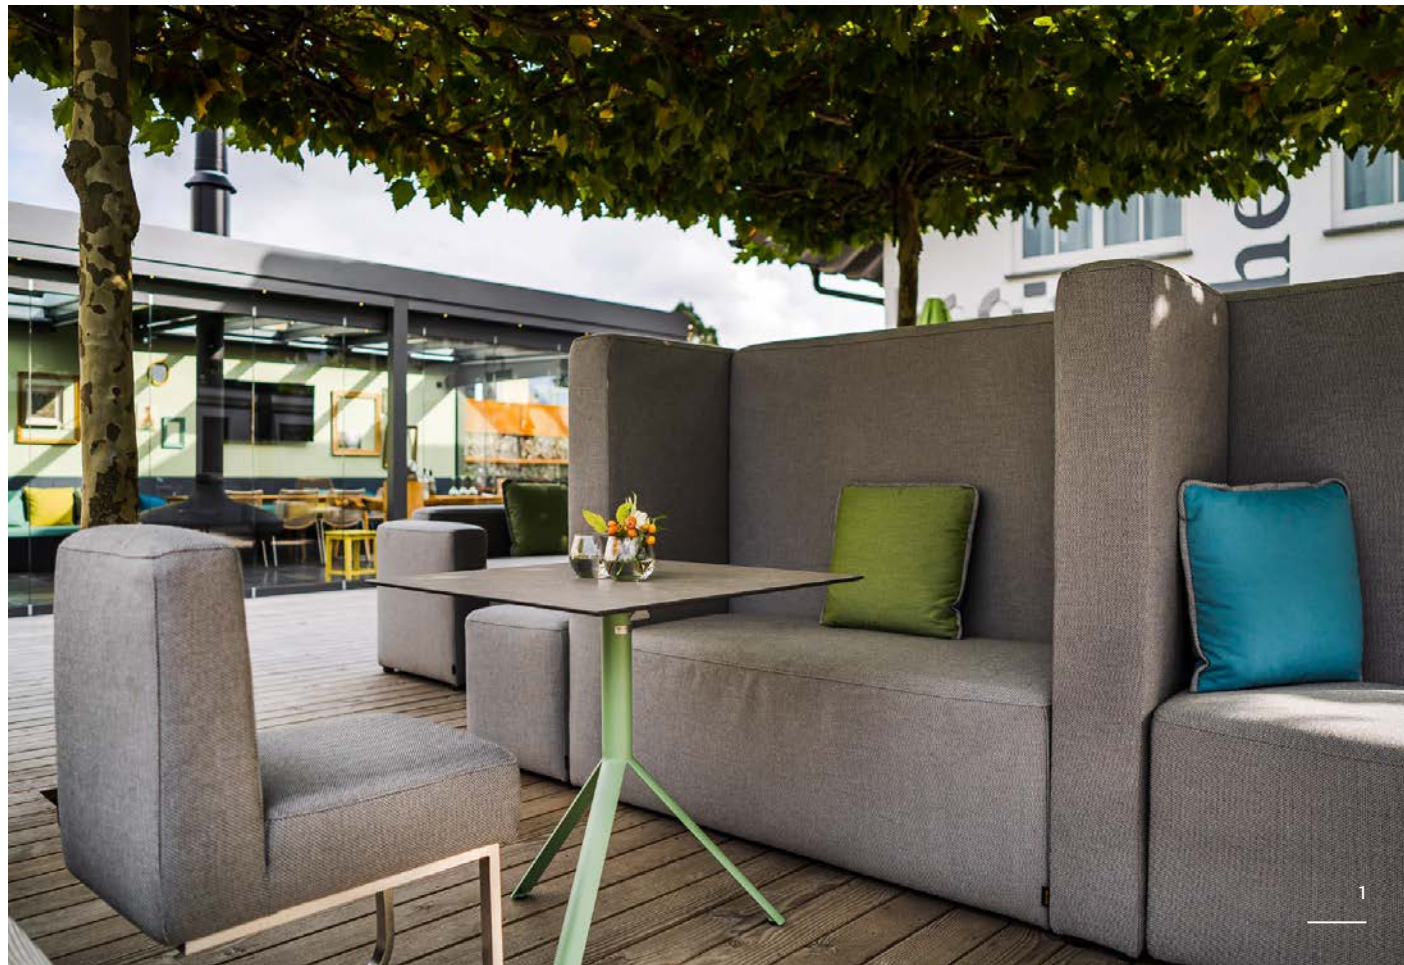

Gastro stands for enjoyment,
taking it easy and communication.
For satisfying midday appetites
and enjoying inviting evenings.

Modularity and flexibility are the core skills of IKONO furniture, and a cornerstone for the new Gastro system. The simple fact that it can be uniformly used both in the inside and outside areas of a restaurant opens up a variety of new possibilities. What's more, the lotus blossom effect on all fabric surfaces can remedy even the greatest red wine faux-pas and make it easy work to maintain.

With the Gastro System, floor spaces can be reinvented time and time again. Units fixed to the wall are passé, and otherwise elaborate retrofitting can be made in just a few simple steps.

Chapter 4

Office System

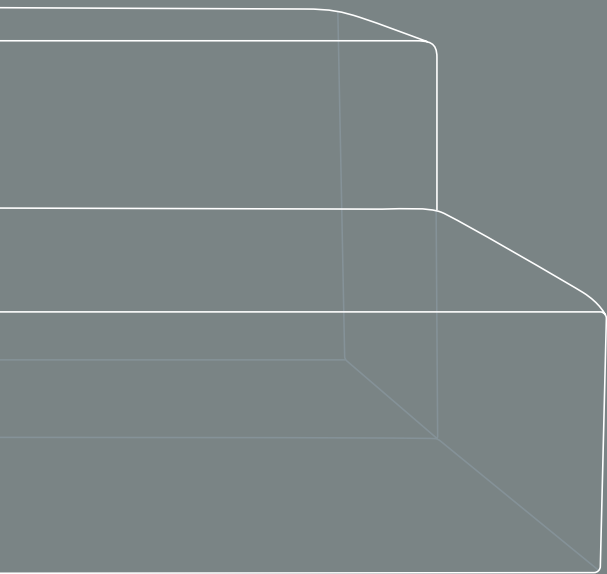

Office stands for focusing
and surpassing yourself.
For productive meetings in
an agile world of work.

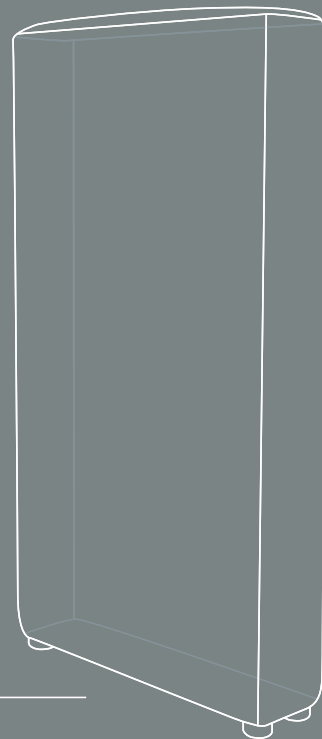

Headquarters

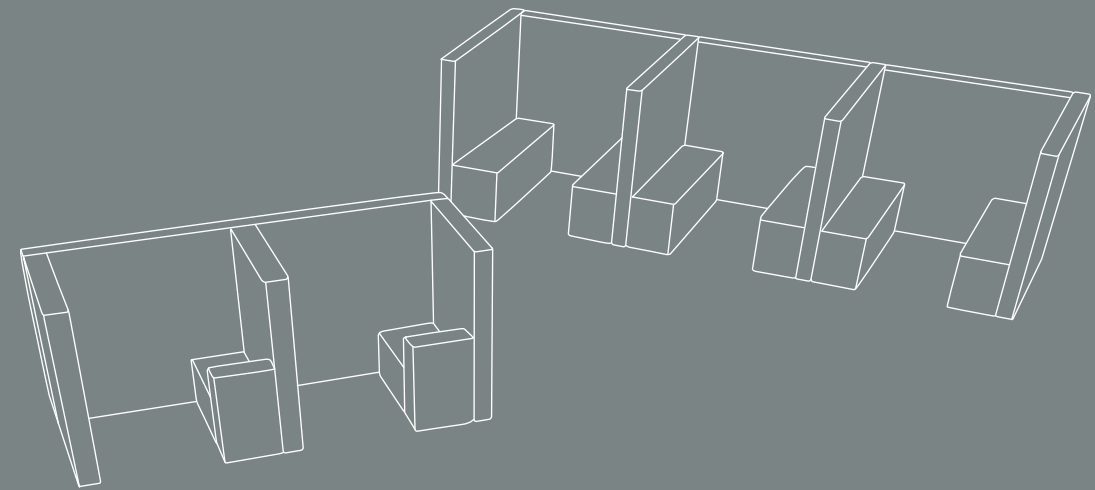

Workspaces

51cm seat height

Soundproofing walls

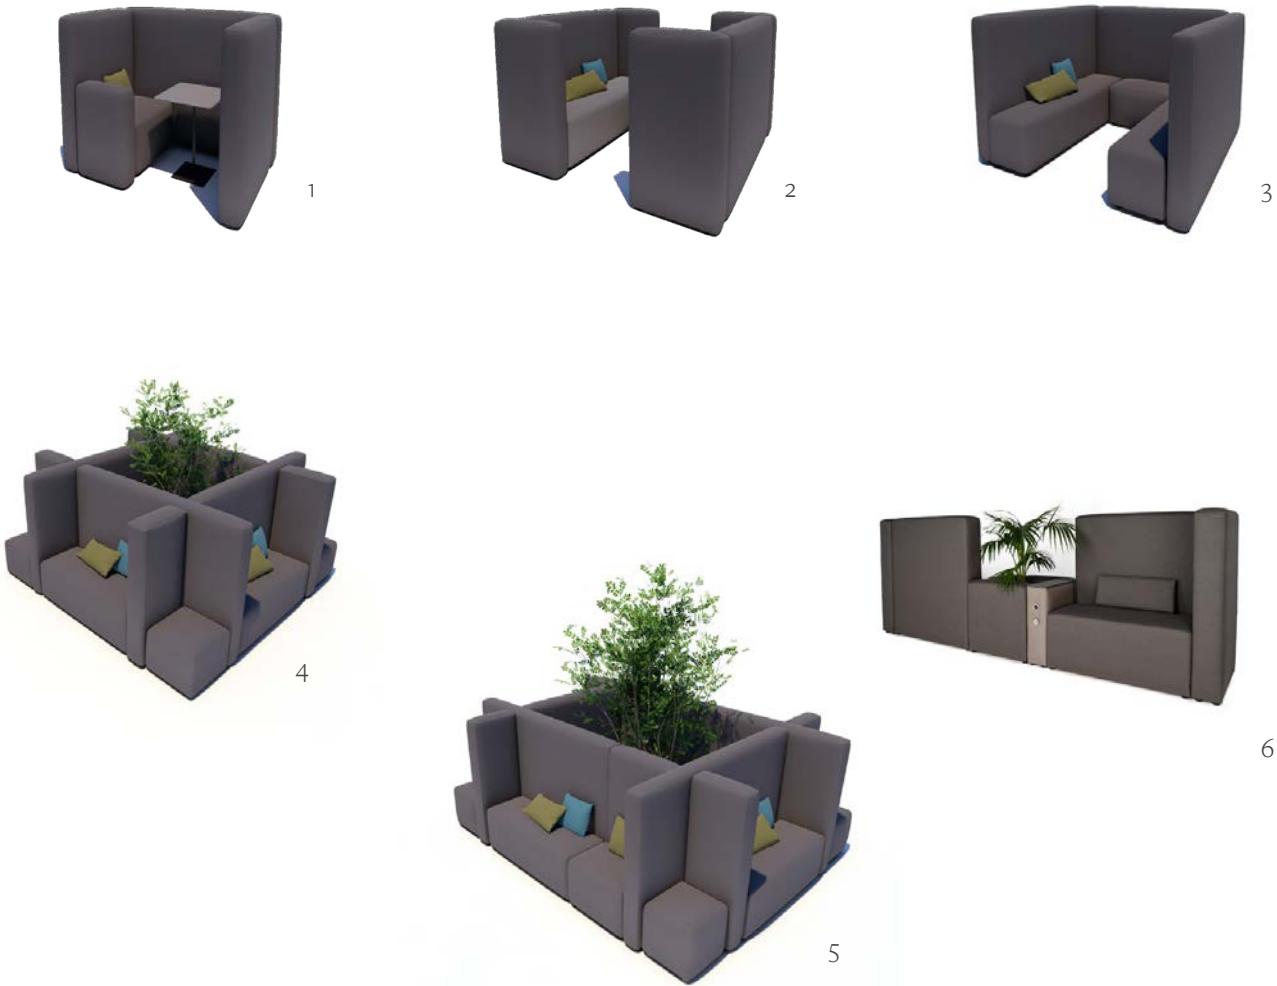

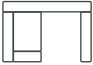

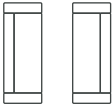

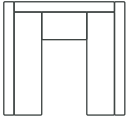

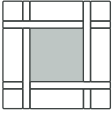

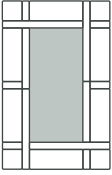

The most diverse cubicles, suited to your working requirements.

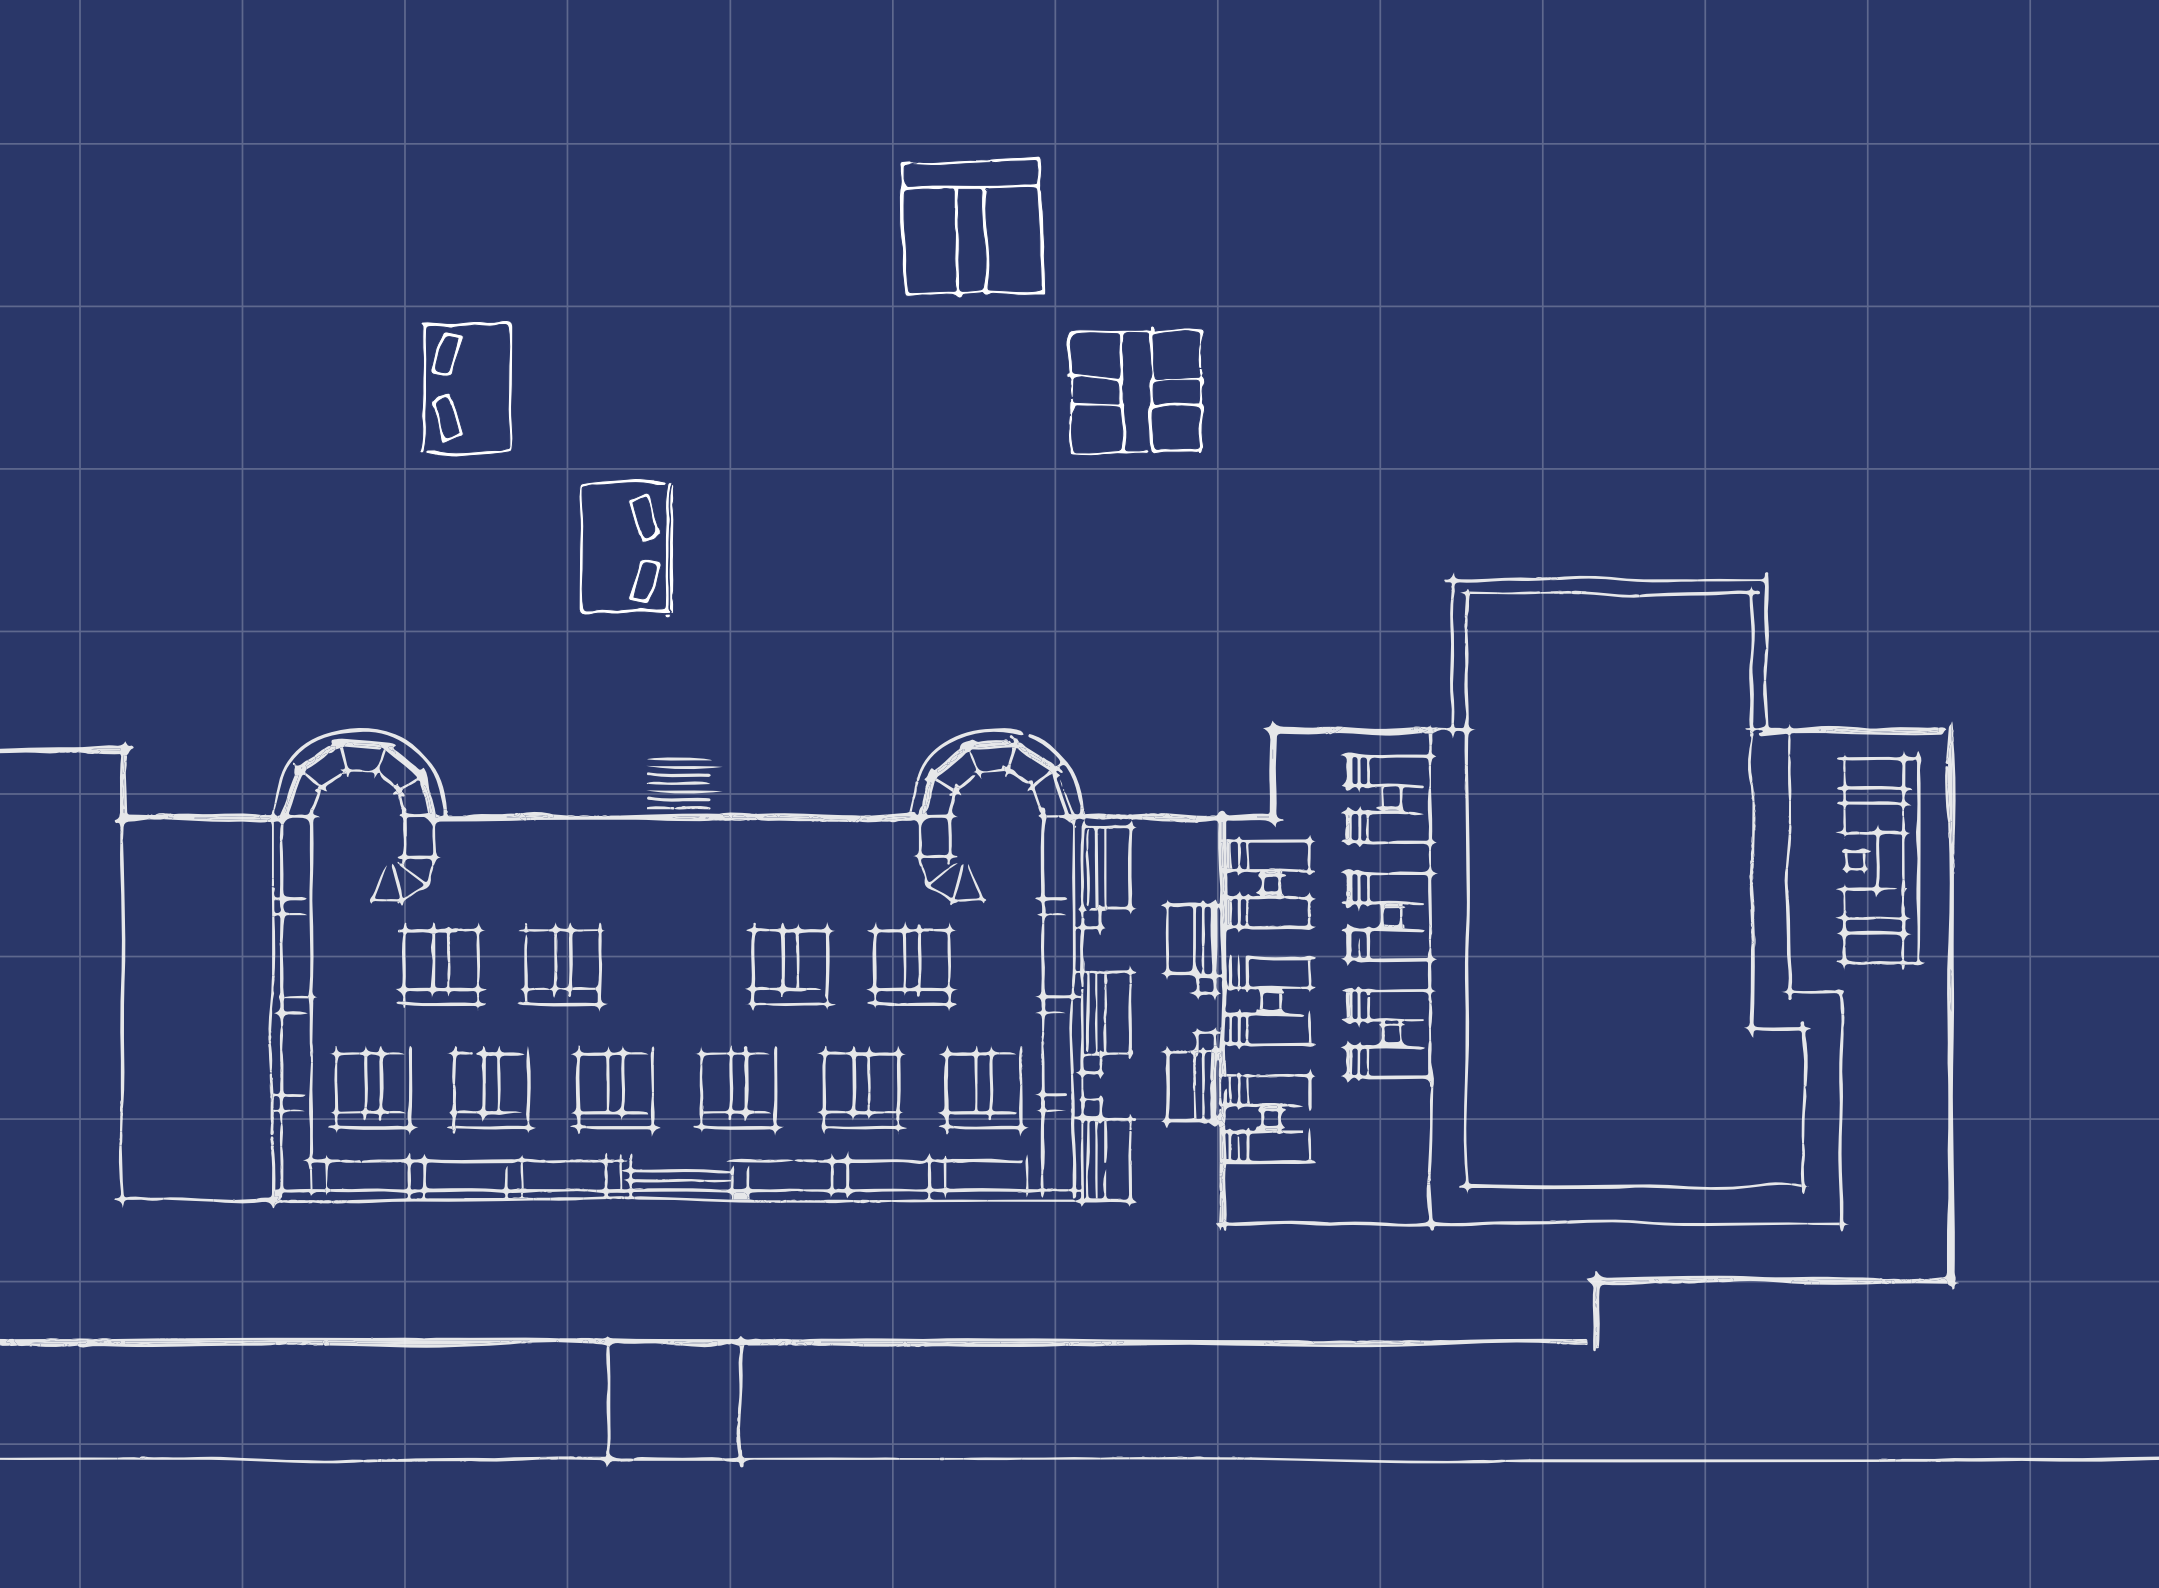

Our newcomer in the business world. The modular Office System is fully committed to the New Work concept, as stiff office spaces and conservative partitions have long become things of the past. Modern employers do well with agile working spaces. In the era of digitalisation, values like freedom and participation play central roles in a company. What could be a better fit than a modular system that meets all these requirements yet can be customised to meet your corporate design?

Chapter 5

Planning

Our planning team can develop client-specific concepts, can create visualisations as a decision-making tool, and can work hand in hand with architects and planners.

STEP 1
Conception

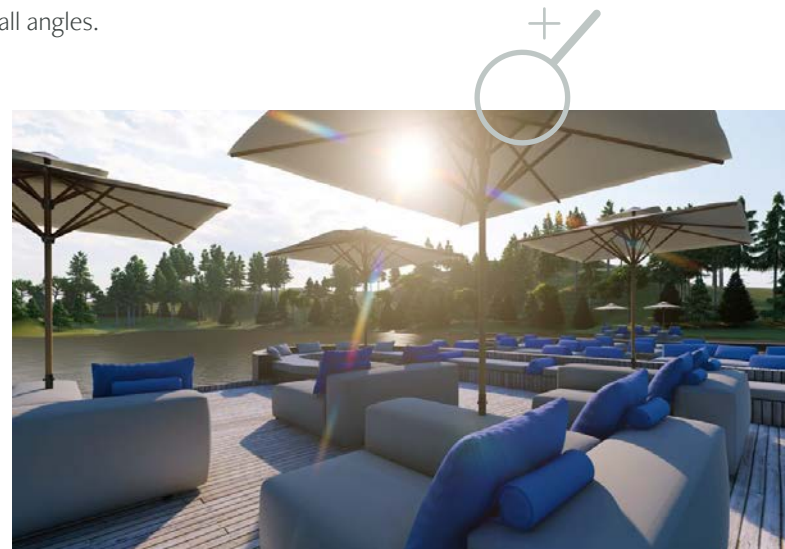

STEP 3
Implementation

Production – Delivery – Assembly ... Take a seat!

STEP 2
Visualization

If the concept and the idea match, we will create photorealistic visualisations for further decision-making tools. The items of furniture are fitted to scale into the environment so that the effect can be assessed from all angles.

Covers

The different covers can be easily attached to the IKONO aluminium profiles with the use of a sewn-on welt. This allows not only a large variety of materials, but also quick reupholstery of the modules.

*Example:
Instead of a complete new purchase, the modules can simply be given a new cover should a new colour be desired.*

- Water-repellent
- Easy to clean
- UV-resistant
- OEKO-TEX®

Branding

With our finishing options, all IKONO furniture can do justice to a company’s individual corporate design.

For weather resistance, a specialist printing service is available for the fabric. For leather and artificial leather, the branding can be done by printing or embossing.

Fire-resistant materials and artificial leather, when fitted, mean that our furniture meets all the B1 requirements.
