

# IKONO

The image shows a high-angle view of a modern lounge or hotel lobby. In the center, there is a large, rectangular planter box filled with various green plants. Surrounding the planter are several modular sofas with orange frames and blue cushions. Each sofa has a small, square, illuminated side table next to it. The floor is covered with a blue and white geometric patterned rug. In the background, there are two long, low, rectangular tables with a blue and white geometric pattern, and a wall with a repeating geometric pattern. Two large, dark, cylindrical pillars are visible on the left and right sides of the image.

# Check in to the new way to relax.

Welcome to IKONO, the supplier of high-quality, modular seating solutions. We believe that every customer has the right to enjoy furniture that is as aesthetic as it is functional. In order to meet different spatial requirements and individual expectations, we have developed a system that knows no bounds. Over 80 individual modules go together to create a modular assembly system for solutions ranging from clever individual lounges to large-scale seating landscapes.

Agile environments, especially those such as hotels, require furniture that offers maximum flexibility. IKONO provides a complete, three-step comfort package:

1 Our modules do not have to be used in one specific setting. From terraces and hotel bars to spa facilities, we have individual solutions that can always be combined in new ways.

2 Assembly takes place without any tools. With the aid of aluminium frames and our patented push-fit system, reorganisation can take place spontaneously and without any significant time investment.

3 The use of different covering materials ensures flexibility for the desired purpose. While our outdoor materials demonstrate unique resistance to water and UV rays, our indoor range offers a variety of fire-resistant materials and artificial leathers.

# The most important questions, at a glance:

## What about fire protection?

Thanks to special materials and artificial leather, IKONO's upholstered furniture satisfies all fire safety regulations.

## How do I take care of outdoor materials?

Dirt on the surfaces can be gently brushed away, and for stubborn stains we recommend using a mild water-based cleaning solution.

## Why does IKONO use aluminium frames?

While wood can be distorted by moisture and is generally prone to error, aluminium frames guarantee the highest possible standard. The proven push-fit technology to put together the individual modules is tailored to the frames and remains reliable – every time you reconnect them.

## Do you have to cover the outdoor furniture when it rains?

No. The lotus effect means that weather-resistant outdoor materials can withstand rain, hail and snow. A special water-resistant shell between the material and the upholstery also prevents the build-up of damp.

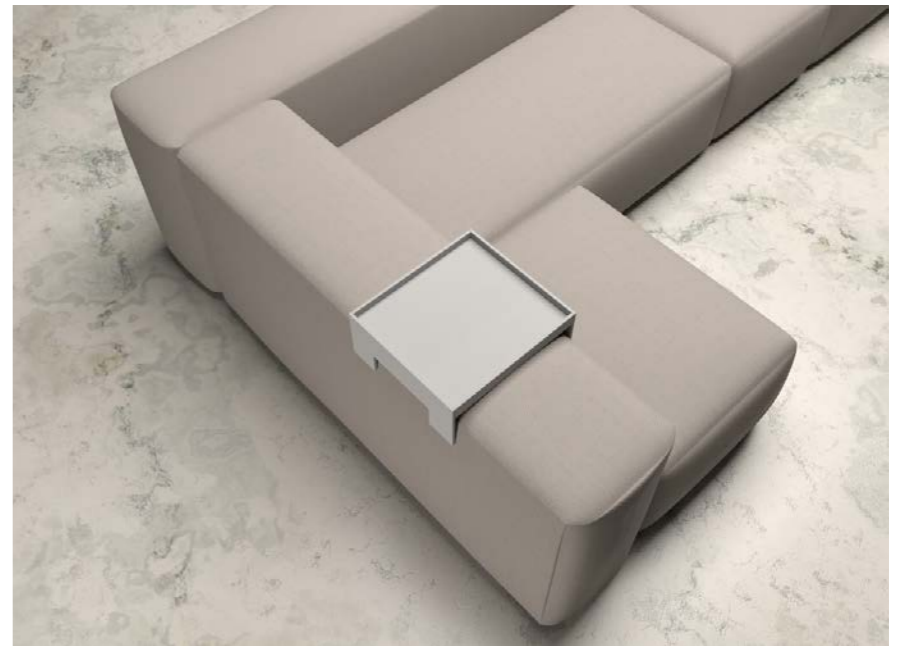

# Lobby

First impressions always count. In a hotel, this happens in the lobby, the place where guests are welcomed. Therefore, the furniture should be positioned in a way that invites guests to relax. The lounge modules are the centrepiece of IKONO's range, designed for use in foyer areas. The extra-soft upholstery and low seat levels adopt the comfort of a sofa at home, turning the furniture into a unique eyecatcher.

Lobby

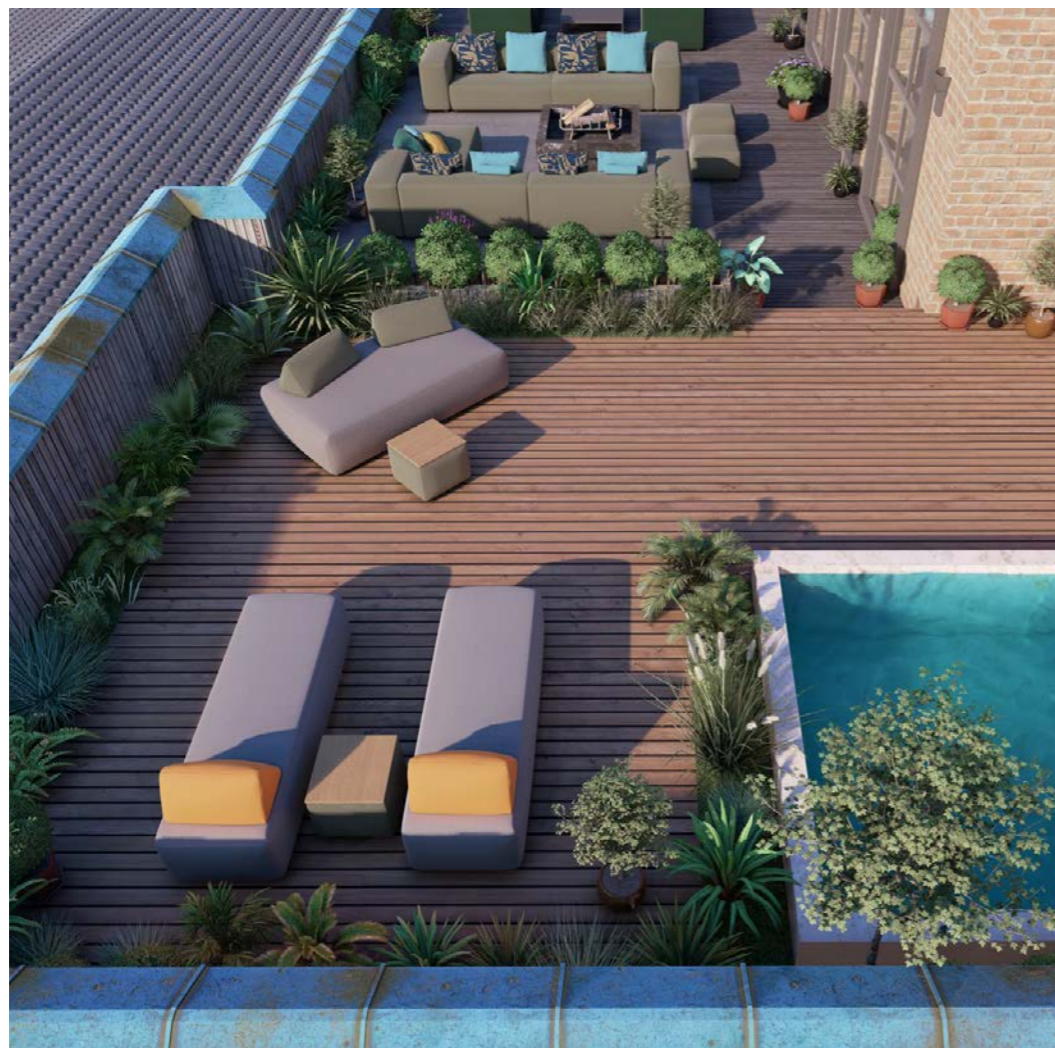

# Terrace and garden

Furniture in outdoor areas is exposed to a variety of problems on a daily basis. Rain, snow, UV rays and natural dirt are the main issues for coverings. Our solution: innovative outdoor materials that do not only deliver haptically, but are also very easy to maintain. The so-called “lotus effect” enables any kind of liquid to drip off, meaning that sudden rain showers or a spilt glass of wine will not wear out the furniture.

*Terrace and garden*

# Pool and spa

Wellness and spa facilities are where IKONO lounges inherently belong. Thanks to the lotus effect and inner water-resistant shells, our furniture is also protected against damp and mould, even in high humidity. The usually feared chlorinated water damages neither the haptics nor the colourfast properties of our materials.

All covering materials are fitted with the Standard 100 by OEKO-TEX® label of quality and meet the highest hygiene standards.

The Relax Lounger is our classic wellness lounge. Thanks to its mobile triangle-shaped cushion, it is wonderful for relaxing after a sauna or pool session.

Pool and spa

# Restaurant and bar

Restaurant areas often stretch from indoor to outdoor spaces. IKONO provides the unique opportunity to use the same seating furniture for the entire area. There is no need for a fixed installation, and the floor area can thus be redesigned at any time. For example, if you need more outdoor seating in summer, modules can be taken from inside and placed outside in just a few simple steps.

Specifically for use in restaurants, we have designed the Square I and II chairs and our own range of tables: these are tailored to our modules in a visually perfect way.

*Restaurant and bar*

# Business

Hotels are always a hub for business travellers. With the aid of soundproof walls and comfortable seating, small business islands can be integrated into indoor areas. As required, they can also be used as spaces for sensitive meetings or productive sessions on the computer. The option to integrate plug sockets, USB ports and lamps is hereby of particular importance.

# Selection of covers

water-repellent

Easy to clean

UV-resistant

OEKO-TEX®

Fire-resistant materials and artificial leather, when fitted, mean that our furniture meets all the B1 requirements.

Our different covers can be easily fitted to the IKONO aluminium frames thanks to a sewn-on keder rail, meaning that covers can be changed quickly and allowing a great versatility of materials.

# Add-ons

Electrical accessories can be fitted to all recliner systems, armrests and side tables. Their exact placement on the modules is down to the customer's expectations and requirements on-site.

Our finishing options mean that all IKONO furniture is able to satisfy the individual corporate design requirements of a company.

For our materials, we use a specialist printing method to ensure water resistance, and for leather and artificial leather, branding can be performed using printing and embossing techniques.
