

**Time for  
relaxation  
on all levels.**

**IKONO**

The market leader for lounge furniture in the wellness and spa sector welcomes you.

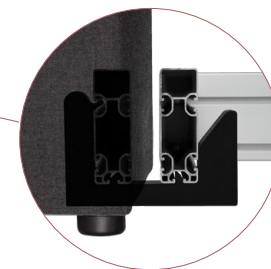

The requirements for upholstered furniture for wellness and outdoor areas are manifold. It must not only provide maximum comfort but also be highly resistant to extreme weather conditions, humid indoor climates, chlorine, stains and other external influences. For a long time, we at IKONO have been devoting ourselves to these challenges. The result: a furniture system that is not only completely water-resistant and UV resistant, but also absolutely modular. Over 80 individual modules allow for small lounges as well as huge seating landscapes to be created – and all this without any tools and in just a few simple steps.

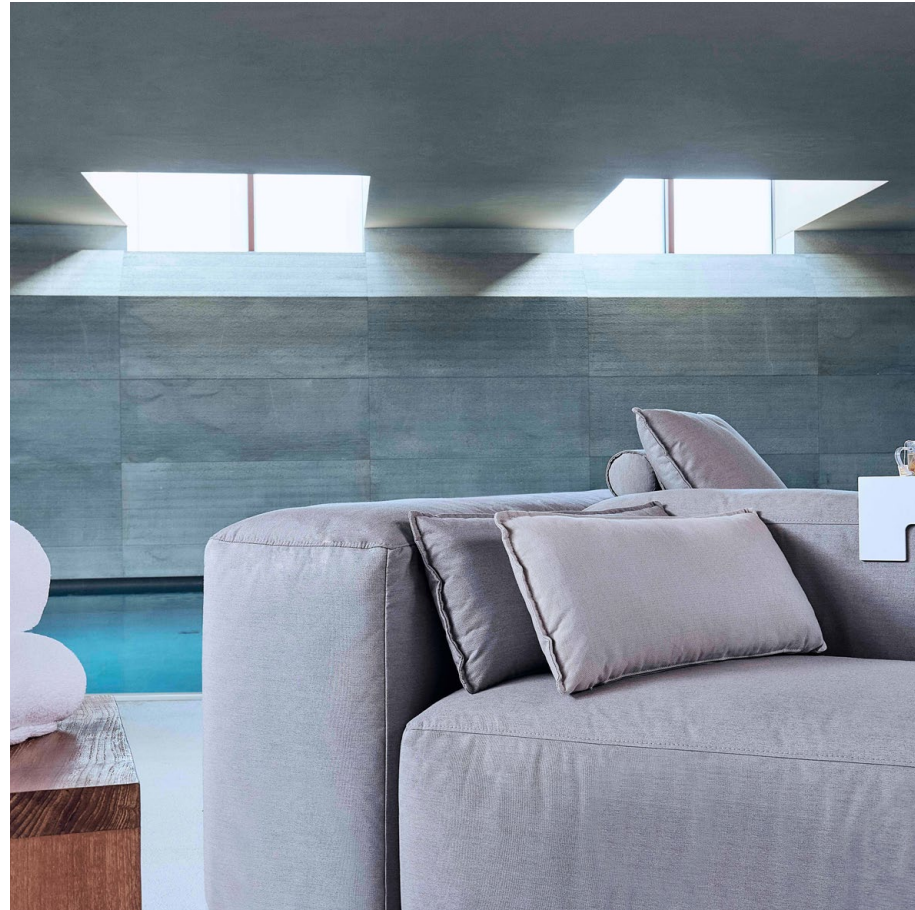

## Innovation at all levels.

A specially developed and patented aluminium frame forms the basis for all modules. Whereas other materials easily warp in changing climatic conditions and do not offer a guaranteed quality standard, an aluminium frame is absolutely moisture-proof and many times lighter than its wooden predecessor. Two modules can be connected using a clamp which is hooked into the respective frames on both sides.

In the case of seat modules, a slatted frame is attached to the base. It allows for dynamic cushioning thanks to synthetic fibreglass rods. Different layers of foam with several degrees of hardness and an inner water-stop cover enhance comfort.

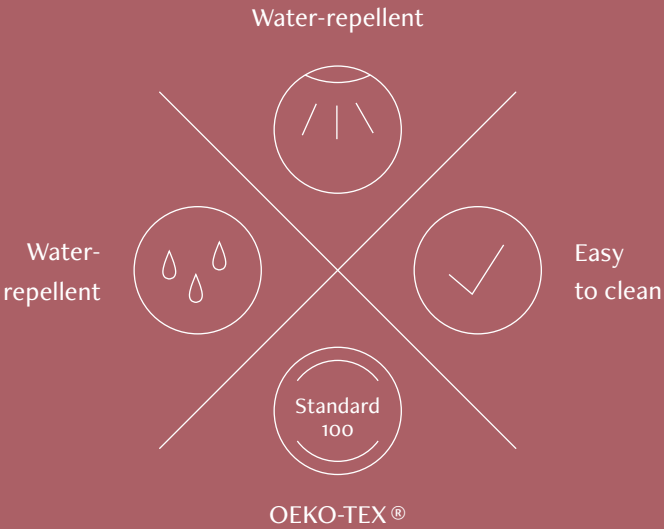

Suitable for outdoor \_\_\_\_\_ and indoor.

# Our upholstery fabric collection is suitable for indoor and outdoor use.

The innovation lies in the feel and finish of the fabrics. Thanks to the so-called „lotus blossom effect“ liquids of any kind simply drip off when they come into contact with the fabrics. The used fabrics are therefore not only easy to clean in case of food or drink stains, but are also resistant to heavy rain and snow.

Free from harmful substances –  
Relaxation for body and mind.

Awarded the standard 100 by OEKO-TEX®  
label in product class 2 for environmentally  
friendly textile products with the skin contact  
that are free of harmful substances.  
They are therefore harmless to health as well  
as skin-friendly and environmentally friendly.
